Excellent

With no accidents, damages, or recalls, and a reasonable mileage for its age, this 2017 Ford Mustang is a solid buy.

Tips When Buying

1 Check Maintenance Records

Ensure regular maintenance has been performed to keep the vehicle in good condition.

2 Test Drive Thoroughly

Test all features and functions of the vehicle to ensure everything is in working order.

3 Get a Vehicle History Report

Verify the vehicle's history to ensure there are no hidden issues or red flags.

How it works

Bumper are descriptive labels (applied by state motor vehicle titling agencies) regarding the status of a motor vehicle, such as "junk," "salvage," and "flood." NMVTIS keeps a history of brands that have been applied to the vehicle by any state. Brand information may help protect consumers from purchasing a damaged vehicle that is presented for sale without disclosure of the vehicle's real condition. Without knowing the brand history, a consumer may pay more than a vehicle's true value or purchase a vehicle that has not been adequately repaired and is not safe to drive.

Possible Lien records Lien issue date Issuing authority 06/01/17 Bank Of America

Impound records

No impound records found. Please note that the absence of any information or results within our reports may not necessarily be 100% accurate, complete, or up to date, so please do not use it in lieu of your own due diligence.

How it works

Photos

In most cases, Impound data is reported to us that day or the day after the event. This data covers jurisdictions in the US that report data to Bumper. In most cases, it includes the date it was reported and the state.

Fxnort records

This section contains all US used vehicles being exported to countries outside the US. Mexico and Canada are considered cross-border and not exports. This data does not contain Imports into the US. Exports also may include vehicles that have been presented for exportation but haven't left the US.

0 Accidents Reported

No accident records found. Please note that the absence of any information or results within our reports may not necessarily be 100% accurate, complete, or up to date, so please do not use it in lieu of your own due diligence.

How it works

Bumper reports are based upon data available and may include historical accident records from 35 state-level agencies, including Alaska, Arizona, California, Connecticut, Florida, Georgia, Hawaii, Idaho, Illinois, Iowa, Kansas, Kentucky, Maryland, Massachusetts, Minnesota, Missouri, Montana, Nebraska, Nevada, New Mexico, New York, North Carolina, North Dakota, Ohio, Oregon, Rhode Island, South Carolina, South Dakota, Tennessee, Texas, Utah, Vermont, Washington, Wisconsin, and Wyoming, to the extent such specific data has been compiled, digitized locally, and is available. We strongly recommend your own due diligence and checking additional sources for states not listed above. As a reminder, even for states where we may have data, we cannot guarantee the comprehensiveness/accuracy of the information provided and you should not rely solely on our data in order to determine whether or not a vehicle was ever involved in an accident.

0 Damage Reports

No damage records found. Please note that the absence of any information or results within our reports may not necessarily be 100%

Bumper compiles reports of damages on vehicles sourced from nationwide auctions and/or sales listings.

Identifying information

0 Salvage Records Reported

No salvage records found. Please note that the absence of any information or results within our reports may not necessarily be 100% accurate, complete, or up to date, so please do not use it in lieu of your own due diligence.

How it works

Bumper reports include NMVTIS salvage data. NMVTIS is the only publicly available system in the United States to which all insurance carriers, auto recyclers, junk yards, and salvage yards, are required, under federal law, to report to on a regular basis. They are required to provide NMVTIS with the following information on each vehicle received into inventory every month:

- The name, address, and contact information for the reporting entity.
- VIN.
- Date the automobile was obtained.
- Name of the individual or entity from whom the automobile was obtained (this information will be available to law enforcement and appropriate governmental agencies ONLY).
- A statement of whether the automobile was crushed or disposed of, or offered for sale.
- Whether the vehicle is intended for export out of the United States.

Auto recyclers, and junk and salvage yards, that handle fewer than five vehicles per year that are determined to be salvage (including total loss) or junk are not required to report to NMVTIS consistent with federal legal requirements for automobile dealers.

A vehicle that has a salvage or total loss history has had severe damage. Salvage and total loss history help consumers avoid purchasing a potentially unsafe vehicle.

Theft Records

Theft data included in Bumper reports originates from FBI National Crime Information Center (NCIC). The NCIC is a governmental system that receives vehicle theft data from approximately 18,000 criminal justice agencies and other law enforcement authorities throughout the United States. This national data includes the reported thefts of self-insured and uninsured vehicles, not all of which are reported to other data sources. Most theft records are only alerts that include the date and status of the theft, nothing more. Thefts may include data in the US and Mexico.

Service and Repairs

•••

No service and repairs records found. Please note that the absence of any information or results within our reports may not necessarily be 100% accurate, complete, or up to date, so please do not use it in lieu of your own due diligence.

How it works

This section provides information about the vehicle's maintenance, repairs, and compliance with safety and emissions standards. Service records show routine maintenance, while repair records highlight significant repairs made to the vehicle. Inspection records indicate the vehicle's adherence to safety and emissions regulations. Examining this section helps evaluate the vehicle's maintenance history, major issues, and compliance with standards. However, data availability may vary.

Please note that the information provided in this section is based on data obtained from a limited number of sources and does not provide nationwide coverage. It is important to understand that the records included in this report may not encompass services, repairs and inspections conducted in all states or jurisdictions.

Inspections

Report Disclaimer

This report does not contain detailed information regarding a vehicle's repair history nor information on all motor vehicles in the United States because some states are not yet providing their vehicle data to the system. Currently, the data provided by states is provided in a variety of time frames; while some states report and update data in "real-time" (as title transactions occur), other states send updates less frequently.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company to be a "total loss" or branded by a state titling agency

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, users are strongly encouraged to also obtain an independent vehicle inspection to ensure the vehicle does not have hidden damage.

It may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.

Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.

The information used to compile this report is aggregated from various government agencies, non-profit organizations, and industry sources. The accuracy and reliability of the information supplied depends primarily on the reporting sources, and all entities involved in compiling this report accept no liability for any errors or omissions.

Cost of Ownership data is ©2025 Vincentric, LLC, and is provided by Vincentric AS IS without warranty or guarantee of any kind. NMVTIS Disclaimer

The National Motor Vehicle Title Information System (NMVTIS) is an electronic system that contains information on certain automobiles titled in the United States. NMVTIS is intended to serve as a reliable source of title and <u>brand</u> history for automobiles, but it does not contain detailed information regarding a vehicle's repair history.

All states, insurance companies, and junk and salvage yards are required by federal law to regularly report information to NMVTIS. However, NMVTIS does not contain information on all motor vehicles in the United States because some states are not yet providing their vehicle data to the system. Currently, the data provided to NMVTIS by states is provided in a variety of time frames; while some states report and update NMVTIS data in "real-time" (as title transactions occur), other states send updates less frequently, such as once every 24 hours or within a period of days.

Information on previous, significant vehicle damage may not be included in the system if the vehicle was never determined by an insurance company (or other appropriate entity) to be a "total loss" or branded by a state titling agency. Conversely, an insurance carrier may be required to report a "total loss" even if the vehicle's titling-state has not determined the vehicle to be "salvage" or "junk."

A vehicle history report is NOT a substitute for an independent vehicle inspection. Before making a decision to purchase a vehicle, consumers are **strongly encouraged to also obtain an independent vehicle inspection** to ensure the vehicle does not have hidden damage. The <u>Approved NMVTIS Data Providers</u> (look for the NMVTIS logo) can include vehicle condition data from sources other than NMVTIS.

Consumer Access Product Disclaimer

NMVTIS data INCLUDES (as available by those entities required to report to the System):

- Information from participating state motor vehicle titling agencies.
- Information on automobiles, buses, trucks, motorcycles, recreational vehicles, motor homes, and tractors. NMVTIS may not currently include commercial vehicles if those vehicles are not included in a state's primary database for title records (in some states, those vehicles are managed by a separate state agency), although these records may be added at a later time.
- Information on "brands" applied to vehicles provided by participating state motor vehicle titling agencies. Brand types and definitions vary by state, but may provide useful information about the condition or prior use of the vehicle.
- Most recent odometer reading in the state's title record.
- Information from insurance companies, and auto recyclers, including junk and salvage yards, that is required by law to be reported to the system, beginning March 31, 2009. This information will include if the vehicle was determined to be a "total loss" by an insurance carrier.
- Information from junk and salvage yards receiving a "cash for clunker" vehicle traded-in under the Consumer Assistance to Recycle and Save Act of 2009 (CARS) Program.

Consumers are advised to visit <u>vehiclehistory.bja.ojp.gov</u> for details on how to interpret the information in the system and understand the meaning of various labels applied to vehicles by the participating state motor vehicle titling agencies.
